ESTABLISHED 1892

A full line of Poultry Appliances, made in a most thorough manner and complete in every detail for those wishing the best the market affords.

HODGSON WIGWARM Portable Houses

For Poultry and Pet Stock

THIRTY-THREE years of manufacturing these goods have taught us the best way to make them and the materials best suited to enter into their construction. We stand back of every article we sell, for we know they are the best of their kind to be found anywhere.

Completed Portable Coops and Houses

All the coops and houses shown in this catalog are made complete in every detail, leaving nothing for the purchaser to do but to screw or bolt together the few sections of which each article consists. We furnish directions and the necessary hardware to erect them, so that anybody of ordinary ability can do this. All doors, windows, screens, etc., are fitted in place, and all coops and houses are well painted two coats of the very best lead paints which are attractive and durable. The roofs are made absolutely waterproof, and will remain so for years, without the use of roofing paper or ready roofings, which are an eyesore at best and last but a few years.

TERMS

Cash to accompany orders or satisfactory references given. Money should be sent by check, post office, bank or express money orders, or by registered mail. *Prices subject to change without notice.* Make all checks payable to

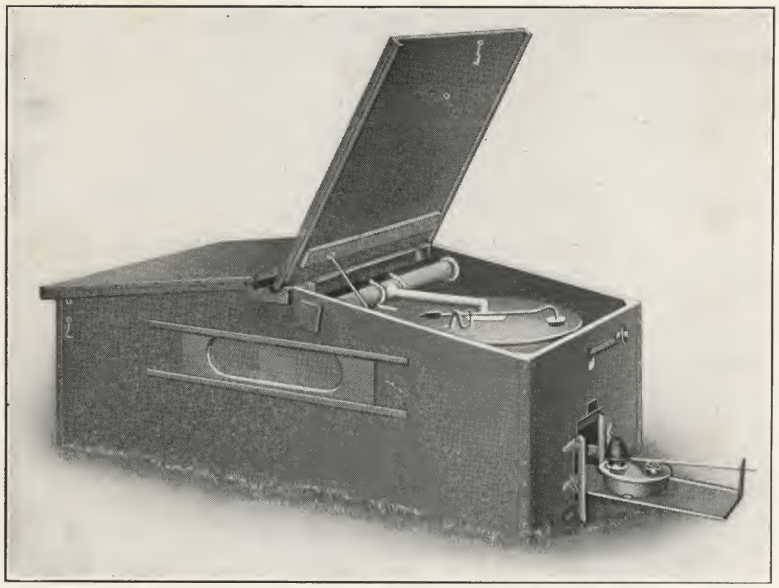
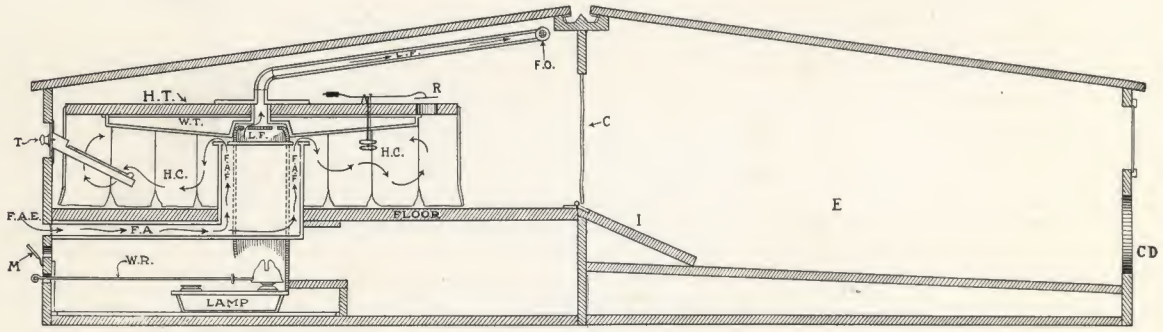
The Hodgson Wigwarm Baby Chick House



WIGWARM BABY CHICK HOUSE

Price in back of catalog. Size 3 x 5 ft. Capacity 50 to 100 chickens or ducklings. It can be safely operated out-of-doors in zero weather, uses little oil, and will raise every healthy chick.

WAY back in 1892 Mr. Hodgson started manufacturing the Peep-o'-Day Brooder, which far outsold all other Brooders for ten years. The WIGWARM Brooder was originated in 1902, it incorporating the good points of the hot air system of the Peep-o'-Day with the addition of a hot water tank, the results being a more uniform temperature and a greater saving in oil. Improvements added for 1922, and the adoption of the new name HODGSON Wigwarm Baby Chick House, mark another important date in the history of artificial brooding. If you operate an incubator or buy baby chicks by the hundred you should rear them in HODGSON Wigwarm Baby Chick Houses.



HT—Hover Top.

T—Thermometer.

HC—Hover chamber with felt curtain attached to hover top HT.

FAE—Fresh air entrance to cold air box.

FA—Fresh air box carrying fresh air through FAF to be heated and passing into hover chamber—HC.

FAF—Fresh air flue, entirely separated from LF; no fumes from LF can enter FAF or hover chamber.

LF—Lamp flue which carries off fumes, yet thoroughly heats the water in tank—WT.

WT—Water tank heating hover chamber and insulated by hover top HT (a double layer of wood), thus holding all the heat in the hover chamber.

R—Regulator controlling the heat in the hover chamber—HC.

FO—Fumes outlet pipe leading to outside of chick house walls.

C—Curtain between hover chamber and exercising room—E.

E—Exercising Room.

M—Mirror to reflect lamp flame so when wick raiser—WR—is turned, the flame of lamp is plainly seen without bending down.

I—Incline hinged to close over curtain opening—C.

CD—Chick Door.

PRICES IN BACK OF CATALOG

The Hodgson Wigwarm Baby Chick House

is a perfect little Chick House, heated by hot water to make the little fellows comfortable, no matter what the weather is outside, and with a wonderful ventilating system which pumps to them continuously warm, fresh air from the outside, thus making every little chick just as strong and healthy as it is possible for that particular little chick to be.

HODGSON BABY CHICK HOUSES are made of the very best materials and are neatly painted or stained. They improve the appearance of any plant and add pride of ownership to a feeling of certainty that the chicks are receiving the best possible care at the most critical period of their lives.

CAPACITY. The 24-inch circular hover (no cold corners) will take care of 60 chicks, allowing plenty of room (most manufacturers would claim a capacity of 100 for the same space), and as the chicks grow, the hover may be removed and these 60 chicks can be brooded in the hover chamber until they have grown to 8 weeks, and no longer need artificial heat.

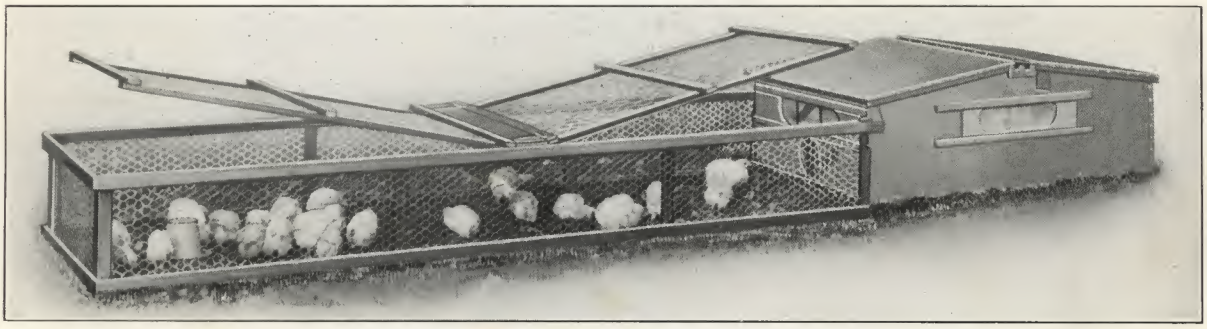
VENTILATION AND HEATING. By consulting the diagram on page 2 you will notice a double tube over the lamp chamber, coming up through the floor of the hover chamber; and a cold air box covering the lamp chamber and extending to the outside, immediately above the lamp chamber door. Through this cold air box outside air is drawn, warmed and is forced up between the two tubes into the hover, where it is further warmed by the heat of the overhead hot water tank and deflected downward on the backs of the chicks. This current of warmed fresh air is constantly passing out under the hover curtain, with other fresh air taking its place. This means that no chick ever has to breathe stale air, but all the invigorating freshness of the out-doors is supplied to them constantly but warmed to just the right temperature.

ACCESSIBILITY AND CONVENIENCE. Raising the roof of either the exercise room or the hover chamber exposes the entire room, making it very easy to clean out. The hover itself consisting of hot water tank with wooden cover and hover curtain is cleverly hung on specially designed hinges, by which it is raised and hooks up against the inside of the raised cover, leaving completely exposed the floor of the hover chamber.

DURABILITY AND ECONOMY. It is solidly built of the best materials. Only the best of red cedar lumber, galvanized iron and paint are used. The lumber is well seasoned, matched, closely joined, and thoroughly waterproofed outside. The lamp reservoir holds enough kerosene to last 48 hours. Two burners are furnished for the lamp, the larger one for very early brooding in cold climates, and a smaller one for more moderate temperatures. The smaller burner will be found ample under any ordinary conditions. It consumes about one pint of oil in 24 hours.

THERMOMETER AND REGULATOR. The thermometer is an excellent one and is so mounted that it is removed from the outside without raising the cover, at the same time not allowing any wind or rain to enter the hover chamber.

We furnish a Regulator of excellent quality which allows excess heat under the hover to escape. A special booklet of the Hodgson Wigwarm Baby Chick House, giving full details and many letters from those who have used them for years, mailed upon request.



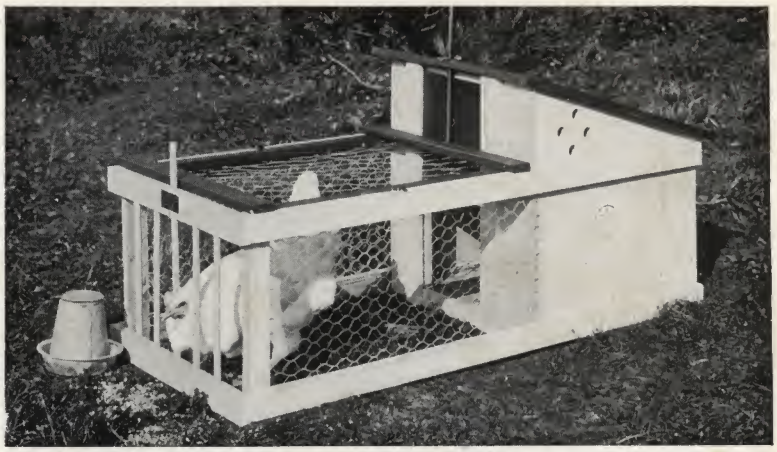
WIGWARM BABY CHICK HOUSE WITH YARD
Yard 3 x 8 ft.

This yard is made of red cedar, well painted or stained and covered with 1 inch netting on the sides and 1 inch netting on top. Top is hinged to raise as shown. The Chick-House and yard are easily moved to fresh ground.

PRICES IN BACK OF CATALOG

Wigwarm Setting and Brood Coop

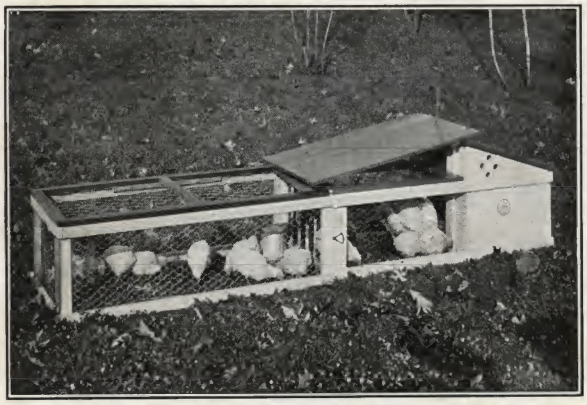
THIS coop is made up of a half dozen sections which can be easily fastened together in a few minutes' time. The material used is cedar and it is neatly painted. The floor, roof and top of the yard are easily removed, and the hen can feed through the open end of the yard without tipping over her food and water.



WIGWARM SETTING AND BROOD COOP — Size 2 x 4 ft.

Folds flat when shipped. We can furnish a wire end to yard, making this coop an excellent hutch for rabbits or guinea pigs. The use of this coop will mean to you less loss of chickens and better hatches with little bother.

Prices in back of catalog.



WIGWARM SETTING AND BROODING COOP WITH EXTENDED YARD AND SHELTER BOARD

Sizes 2 x 8 feet. Prices in back of catalog.
This Coop is also used as a hutch for rabbits or guinea pigs.

F. A. O. Schwarz

5TH AVENUE AND 31ST STREET,
NEW YORK.

"Regarding the poultry appliances which I received from you, the setting coops I have used for several seasons, have always found them most satisfactory."

HENRY F. SCHWARZ.

Spencer Farm

WESTBROOK, CONN.

"Our experience with your setting coops has been very satisfactory indeed; in fact we would hardly know how to dispense with them. We only hatch out from fifteen hundred to two thousand each year and since using your coops have hardly lost a chick."

C. E. POMEROY.

THE IDEAL WAY TO HATCH AND BROOD CHICKENS

One person can care for many setting hens in a few moments' time. The hens are by themselves and cannot leave their eggs. When the chickens are hatched the coops should be scattered about the grounds and the chickens allowed to run at large, the hen confined. Chickens up to eight weeks old will do no harm to a garden, but if chick enemies are likely to take them, the extended yards, as illustrated on this page, should be used.

PRICES IN BACK OF CATALOG

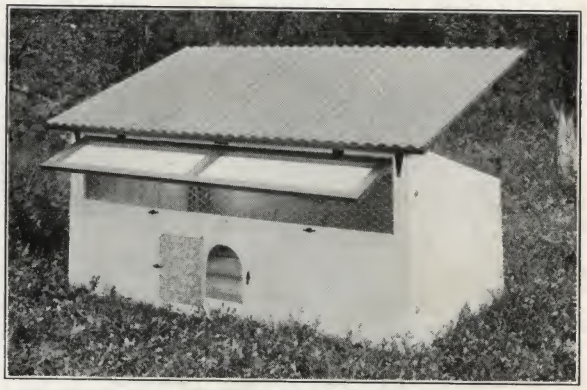
The Wigwarm Colony Coops

For Growing Chickens or Ducks

THESE coops are for growing chickens (or ducks) after they leave the brooder or mother hen, as the chickens should have an opportunity to roost as soon as they show that tendency—from six to eight weeks old. The coops are perfectly weather proof, well ventilated, warm and animal proof. The open front is protected by the canvas covered frames —acknowledged by all the State Experiment Stations to be far better than glass, giving ample protection and perfect ventilation without drafts.

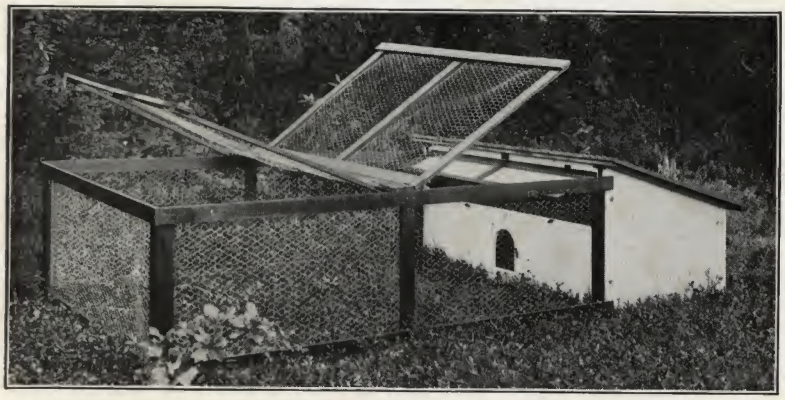
Although these coops are generally used for growing stock, they are often found very useful for a hospital for sick fowl, or to break up setters. They are also used to separate cockerels, or to shelter fowl that are moulting, which if allowed free range will quickly take on their new feathers and be in fine laying condition before cold weather.

The coops have a removable floor, two roosts and a hinged corrugated red cedar roof. They are made in six sections and can be put together in ten minutes' time. The exterior is neatly painted.



WIGWARM COLONY COOP

Size 3 x 3 ft. Capacity 20 chickens or ducks.
Size 3 x 6 ft. Capacity 40 chickens or ducks.



COLONY COOP AND YARD

Yard for 3 x 3 ft. Coop is 3 x 8 ft.
Yard for 3 x 6 ft. Coop is 6 x 8 ft.

THE PUREOXIA COMPANY,
BOSTON, MASS.

"I am very glad to report that the 3 x 6 ft. WIGWARM Colony Coops which I purchased of you have proven most satisfactory in every way.

"I have no suggestions to make of any changes whatever that would make them more practical and satisfactory.

"I have recently placed my order for a two unit No. 4 Sectional Poultry House, and have every confidence that it will give me the same satisfaction that the various buildings that I have purchased of you in the past have done."

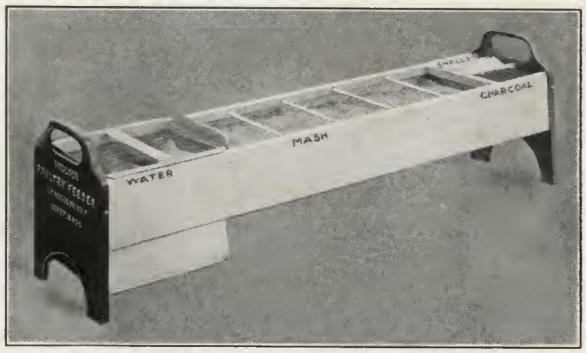
HARRY A. EDGERLY.

Note.—Mr. Edgerly has used our portable houses for the past 15 years.

Dr. Prince T. Woods, of Silver Lake, Mass.

has an international reputation as an authority on practical poultry husbandry. During the winter of 1912, the coldest winter on record, he raised over 3,500 chicks in 20 WIGWARM Brooders out of doors, unprotected. Dr. Wood writes as follows:

"I chose the Wigwarm Brooder because I knew it to be a practical fresh air brooder that combines warm, fresh air heat with hot water heat. No difficulty was experienced running the Wigwarms out of doors in below zero weather, although the location was bleak and windswept. The first lot of White Rock chicks went into Brooder No. 1 on the last day of February. Of this lot every chick was raised. Although we had a number of below zero nights the chicks were always comfortable and grew rapidly into strong, vigorous birds."

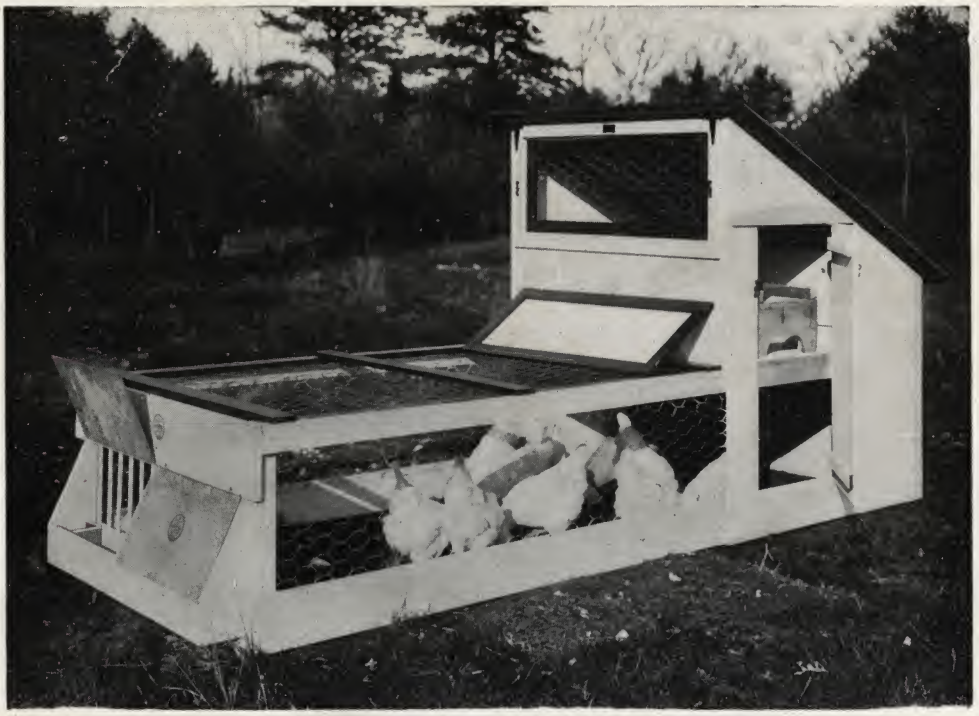


WIGWARM POULTRY FEEDER. Size 8 x 36 in.
Holds water, dry mash, shells and charcoal enough for 40 hens. This feeder furnished with each unit or pen of No. 3, 4 and 5 Poultry Houses.

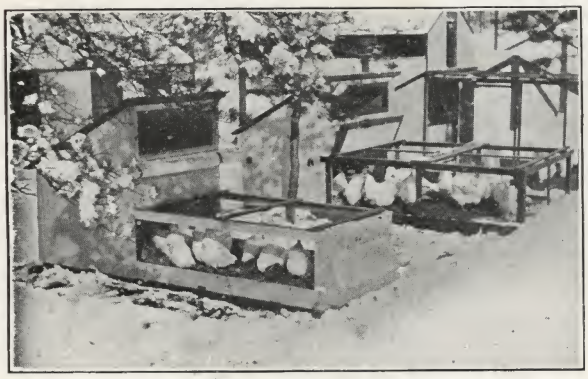
PRICES IN BACK OF CATALOG

Wigwarm Colony Laying House No. 0

WITH over twenty years' experience and numerous experiments, this poultry house has proven to be the most profitable for egg production and popular style for a dozen hens whether used in the back yard or in large numbers on farms. Its two-story feature gives in the upper part a roosting room that is warm and free from drafts, with two removable roosts with nests. The lower part gives a yard and scratching shed, in which are located a convenient dry mash hopper, shell box and water trough, that is protected from the weather and very easy of access. The yard can be protected from storms as well as the hot sun by a conveniently arranged heavy waterproof canvas cover, as shown in the illustration on next page, which we furnish if desired. The ease with which the house is cleaned out is shown by the illustration—simply a hoe with a wheelbarrow being used. All the work of feeding, gathering the eggs and watering the fowl is done from the outside, making it quickly and easily accomplished. The house is easily moved to fresh ground, thus keeping the yard sanitary with minimum labor.



Size of House 4 x 4 ft., Run 4 x 10 ft. Height 5 ft. Capacity 12 Hens. Price in back of catalog. Complete with nests, roosts, fountain, feed hopper, yard, etc. It is easily moved to fresh ground by one man. The eggs are gathered and hens watered at the rear, while the feed hopper is in front and protected.

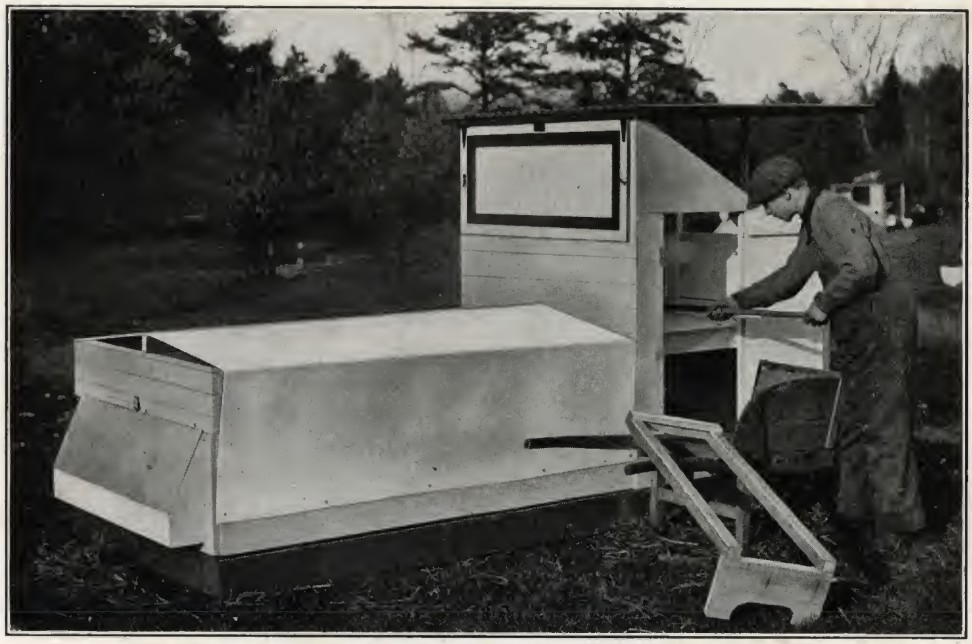


No. 0 Houses are practical summer or winter and will insure you of a good egg yield at all times.

One man can give better care to a large number of hens and obtain a larger percentage of eggs with these houses than with any other style. It is thoroughly well made with matched board sides, a corrugated *red cedar* roof, painted two coats. It is shipped "knocked down" in eight sections that can be fastened together by anyone in a half hour's time.

Wigwarm Colony Laying House No. 0

(*With Storm Cover*)



No. 0 HOUSE WITH STORM COVER. Prices in back of catalog.

The Storm Cover gives perfect shelter from storms yet good light and ventilation within the yard. It is quickly rolled back when not wanted. It is made of heavy canvas and waterproofed. This picture also shows the operation of cleaning out the house. The house and yard are raised up from the ground on a 6-inch board or joist which is desirable during the winter when the house is not likely to be moved.

In Zero Weather

1925 CHESTNUT STREET,
PHILADELPHIA, PA.

"Some time ago I wrote you a letter asking your advice in the matter of risking large comb birds in your No. 0 Colony Laying House for fear of frost bite in zero weather. I thought you would be interested in learning that I acted upon your advice, and with the temperature at zero the birds confined in these two houses were the only ones of my flock who escaped frost bite. I have in use five different types of houses, varying in capacity from twenty to seventy-five birds, so that this makes a rather interesting comparison."

HAROLD G. GOLDBERG.

A few of the many poultry houses we have exhibited at the Grand Central Palace and Madison Square Garden Poultry Shows, New York City. Our exhibits have covered an area of over an acre of space and housed nearly 1000 hens at a time

PRICES IN BACK OF CATALOG

Wigwarm Colony Laying House Nos. 1 and 2

WIGWARM COLONY LAYING HOUSE No. 1

Capacity 12 hens if given a yard or 8 if no yard.
Size 4 x 4 ft., 5 ft. high. Price in back of catalog.

No. 1 Colony Laying House

THIS house is similar to the No. 0 house described on page 6 except that it is closed in under the floor and has no yard. In this house the hens can be kept confined or given a yard any size desired. If kept confined it is well not to keep over eight hens in it, but with a yard twelve hens will do well. Both house and hens are taken care of from the outside, making the care easy and agreeable. The two story arrangement gives the hens an upper laying and roosting room and a lower scratching shed. It is furnished with nests, roosts and a cage fountain for water. The front screen is protected by a canvas cover for use in cold weather. Neatly painted.

No. 2 Colony Laying House

THIS house is large enough for eight hens and they will lay well, kept in confinement, especially during the winter. It is very convenient to care for, and has several very attractive features. The roof is hinged to open out, giving access to the interior. It is made in sections, is well painted, and can be bolted together in a few minutes by anyone. It is warm, well lighted and ventilated. It has a removable, sanitary dropping board and roosts, nests and water dish. The front screen is protected by a canvas cover for use in cold weather. Neatly painted.

"INISFAD," MANHASSET, N. Y.

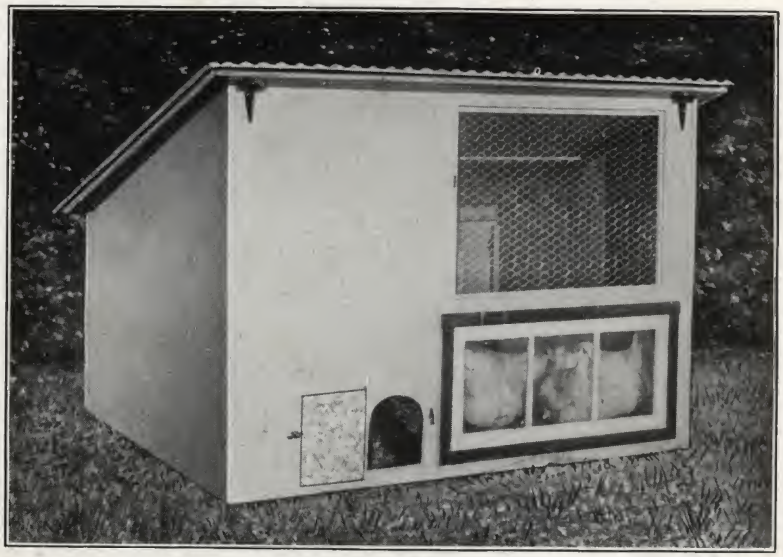
"We appreciate your courteous letter and beg to take the liberty to state that we are very well pleased with the condition and appearance of the No. 2 WIGWARM Colony Laying Houses and the 3 x 6 ft. Colony Coop and Yard."

N. F. BRADY ESTATE,
Ewen MacKenzie,
Landscape Supt.

Eggs at 20° Below Zero

108 FULTON STREET,
NEW YORK CITY.

"I enclose you a little photograph of Colony House No. 0 which I bought from you last fall, and no doubt it is the most satisfactory house ever made. My chickens were laying at 15 and 20 degrees below last winter." E. F. KELLER.



WIGWARM COLONY LAYING HOUSE No. 2

Size 4 x 6 ft. For 8 hens. Prices in back of catalog. A 6 x 8 ft. covered yard.

PRICES IN BACK OF CATALOG

Wigwarm Colony Laying House No. 5

THE No. 5 Colony Laying House is made of the same materials and with the same interior fittings as the No. 3 and 4 houses. It is made in a few completed sections with door and window, all fitted in place, well painted and can be key bolted together in an hour's time by anyone. The bolting of these completed sections of this house is all that is left for you to do, for all other details are attended to before it leaves the factory. It is made mostly of red cedar and will last a life time.

Interior Fittings consist of a six-foot detachable dropping board with two 6-foot roosts, sanitary nests and our up-to-date Poultry Feeder. (See pages 5 and 14.)

Eggs at 20° Below Zero

EAST ST. LOUIS, ILL.

"It occurred to me that a word about my WIGWARM Colony Laying House No. 5 would be appreciated by you and therefore permit me to say, as a beginner in poultry raising in the back yard of a city lot, the egg result obtained in this house is second to none.

"The present winter has been the most severe in many years. The thermometer during January has gone as low as 20 degrees below zero. I have nine pullets which were practically locked up in the house most of the time and in the yard attached, which is 12 x 6.

"From January 1 to and including January 20th, I obtained 78 eggs, from a fairly good strain of Barred Plymouth Rocks."

F. F. SCHNEIDEWIND.

WIGWARM COLONY LAYING HOUSE No. 5

Size 6 ft. wide by 8 ft. deep. Capacity 20 Hens.
Additional 6 x 8 units or pens can be added and include partition.
Prices are in back of catalog.

Grain, Camp or Garden Tool House

THIS camp or garden house is extensively used for many purposes: for camps, kitchen or sleeping rooms of camps, garden toolhouse, grain house, storage room or shop.

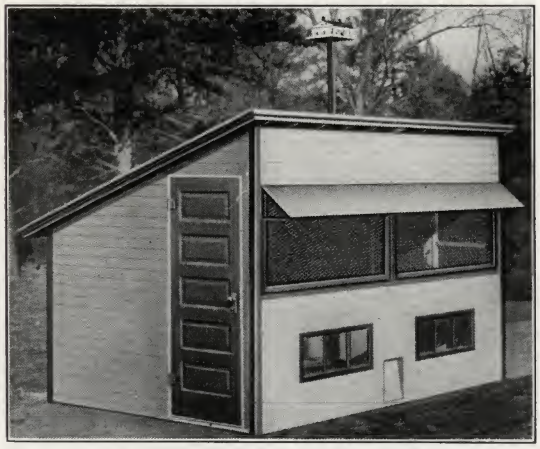
It is similar to all our portable houses, and will last a lifetime. It is practical for use winter and summer. Size 10 x 10 ft. and can be added to in units of the same size. It has a glass door with two windows on one side and one opposite the door. A plant bench runs along the side under the windows. If two windows are desired on opposite side add $10.00 to price.

Size 10 x 10 ft. Price in back of catalog. Additional 10 x 10 units to add to this house.

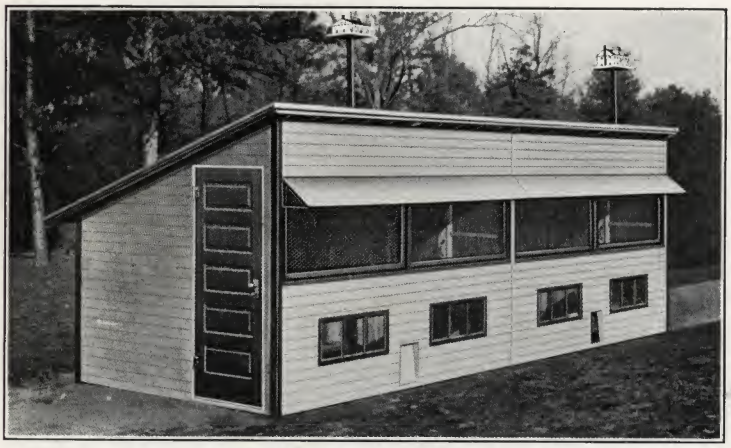
PRICES IN BACK OF CATALOG

Wigwarm Sectional House No. 3

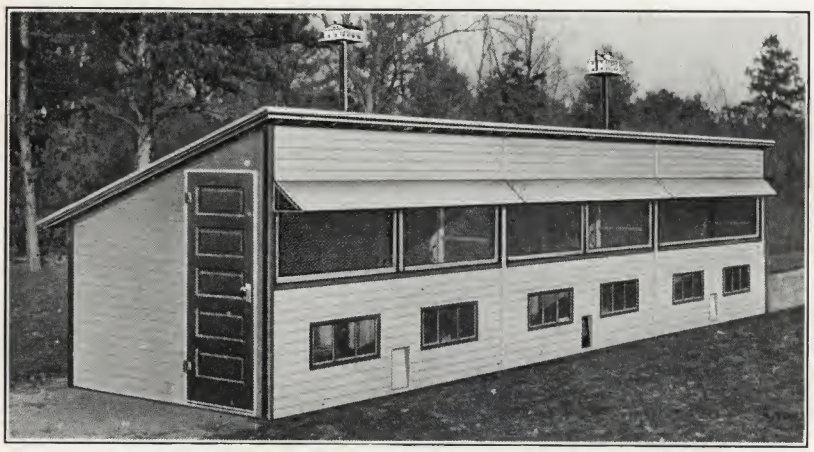
(Unit System and can be added to at any time)



No. 3 LAYING HOUSE. ONE UNIT HOUSE
(1 pen) 8 x 10 ft. Capacity 30 hens.



No. 3 LAYING HOUSE. TWO UNIT HOUSE
(2 pens) 8 x 20 ft. Capacity 60 hens.



No. 3 LAYING HOUSE. THREE UNIT HOUSE
(3 pens) 8 x 30 ft. Capacity 90 hens.

A UNIT SYSTEM of construction is used in these houses, making it possible to increase their size at any time. The pictures show from one to five units, although any number of units can be added at will. The five-unit house is the most popular, and with good care 150 laying hens will give excellent results in this house. Partitions with gates are used to divide the houses into units or pens.

Their Construction — Our sectional houses are constructed differently than our colony houses described on the previous pages. They are framed buildings covered with a matched *red cedar* siding, which is free from all defects, resembling clapboards on the outside and sheathing inside.

The exterior is painted two coats, the interior is treated with a vermin proof disinfectant, as are also the fittings. The roof is a *red cedar rabbeted* boarding, lined with a heavy waterproof and vermin proof fibre. About one-half of the front of the canvas storm frame that is hinged to hook up against the inside of the roof, this being the most up-to-date arrangement for a fresh air house. The house has a panel door with a good lock. The windows below the screens give ample light.

From the above the reader will readily understand that it would be difficult to construct a more durable, practical and sanitary fresh air house at any cost.

These sectional houses we have been making for over twenty years and they are without doubt the best of their kind to be found in either the portable or stationary type. They are made of a few sections that are quickly erected by means of our special key bolts.

(*Continued on next page*)

Wigwarm Sectional House No. 3

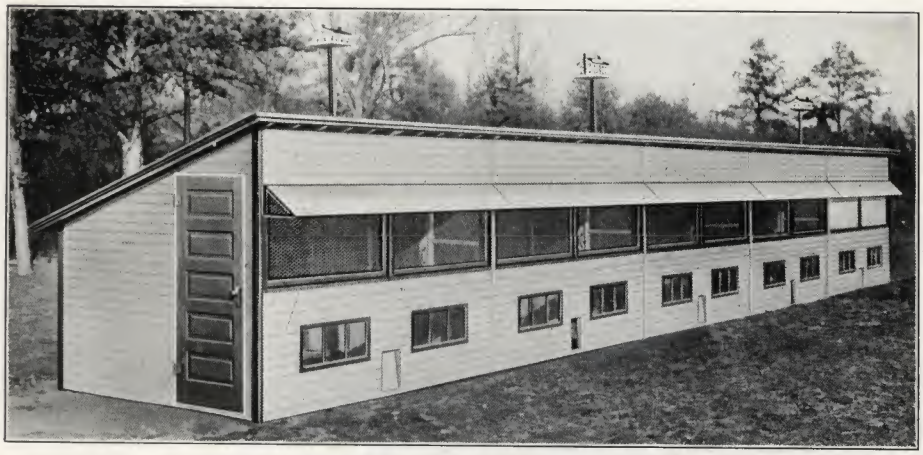
No. 3 LAYING HOUSE. FOUR UNIT HOUSE
(4 pens) 8 x 40 ft. Capacity 120 hens.

BUCHANAN, MICH.

"I take pleasure in advising you that the two unit No. 3 Sectional Poultry House, the 3 x 6 ft. Colony Coop, and the two No. 2 Kennels which I have purchased through you have been entirely satisfactory. I recommend them to my friends whenever occasion arises."

EUGENE B. CLARK.

Each unit is fitted with a 10 foot detachable dropping board and two 10 foot roosts, sanitary nests and our Poultry Feeder as shown on page 5. The open front is protected by cloth frames. No floors are furnished, as we believe a good gravel or cement floor better than a wooden one; but if a wooden floor is wanted, we charge 30 cents per square foot or $24.00 per unit for a good hard pine floor.



No. 3 LAYING HOUSE, five units
Size 8 x 50 ft. Five Pens. Capacity 150 hens.
Made in units or pens 8 x 10 ft. each.

PRINCETON, MASS.

"In reply to your favor of October 16, I would say that we like our No. 3 Poultry and Grain House, and find it satisfactory."

SUSAN MINNS.

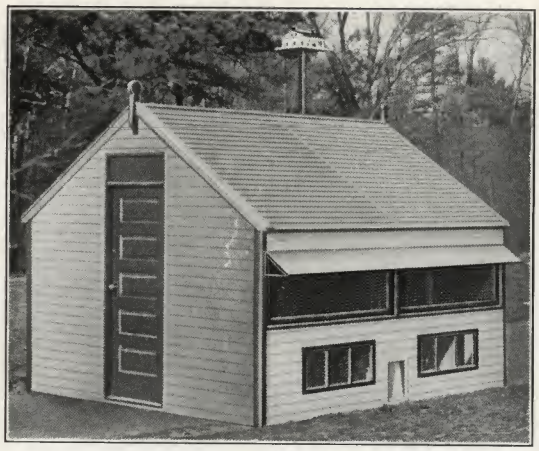
PRICES IN BACK OF CATALOG

Wigwarm Sectional House No. 4



No. 4 SECTIONAL POULTRY HOUSE
First Unit 10 x 10 ft. Capacity 40 hens.

(Unit System—can be added to)

A UNIT SYSTEM of construction is used in these houses, making it possible to increase their size at any time. The five pictures show from one to five units, although any number of units can be added at will. The five-unit house is the most popular, and with good care, 200 laying hens will give excellent results in this house.

Each unit is 10 x 10 feet, and when more than one unit is purchased, we furnish a partition, as shown on page 14.

The Construction—It is a framed building, covered with a special matched *red cedar* siding forming clapboards on the outside and sheathing on the inside. The exterior is painted two coats of the best paint, the interior is treated with a vermin proof disinfectant. The roof is covered with a *red cedar* rabbeted boarding and lined with a heavy water and vermin proof fibre.

No. 4 SECTIONAL POULTRY HOUSE. Two Units 10 x 20 ft.
First unit and one additional unit. Two Pens. Capacity 80 hens.

About one-half of the front of the house is netting protected by two canvas storm frames, hinged to hook up against the inside of the roof, with windows below, this being the most up-to-date and sanitary arrangement for fresh air houses.

Each unit is made up of from four to six sections which are fastened together with our special key bolts, so that two inexperienced men can easily set up a five unit building (10 x 50 feet)in a day's time.

No. 4 SECTIONAL POULTRY HOUSE. Three Units 10 x 30 ft.
First unit and two additional units. Three Pens. Capacity 120 hens.

All of the materials used are of the very best quality and will last for years. So complete are these buildings that you are put to no further expense in fitting them up. The photographs give a good idea of their appearance, although they cannot do them justice, and no matter if you buy one or 100 of our houses, they will all be of the same uniform good materials and workmanship. By this, the reader can readily

Wigwarm Sectional House No. 4

No. 4 SECTIONAL POULTRY HOUSE. Four Units 10 x 40 ft.
First unit and three additional units. Four Pens. Capacity 160 hens.

17 East 38th Street
New York City

"In reply to your inquiry regarding the three unit Grain and Poultry House that I purchased from you last year, will say that it is entirely satisfactory.

"I feel that you should also know, that everything that I have purchased from you in the past six years has been satisfactory, and giving 100% service."

Charles J. Imperatori, M.D.

understand that it would be difficult to construct a more durable, practical, attractive and sanitary fresh air poultry house at any cost.

Floors—We do not supply a wooden floor but can furnish it if desired; price in back of catalog. A gravel or concrete floor is better.

Interior Fittings consist of a 10-foot detachable dropping board, two 10-foot roosts, nests and feeder in each unit as shown on page 5.

Thompson-Starrett Company
Building Construction
Office of the President New York City

The Play House, the six large Poultry Houses, the Kennels and the Setting and Brood Coops have proven satisfactory, and the completed results in every instance represented a lower outlay than could be obtained under any other method I know of. Certainly this work would have cost more if the ordinary methods had been followed of buying raw materials and then assembling and finishing them at the site."

L. J. Horowitz.

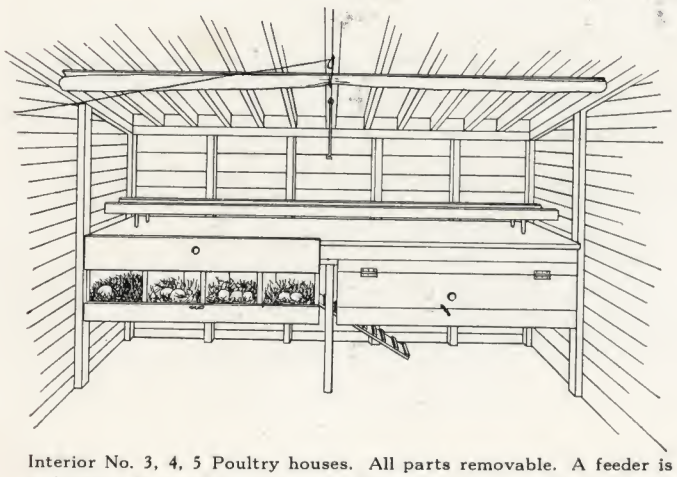
10 x 50 ft. House, 5 pens
Capacity 40 hens per pen

Plan No. 4. 5 Units or Pens.

PRICES IN BACK OF CATALOG

Interior of all WIGWARM Poultry Houses



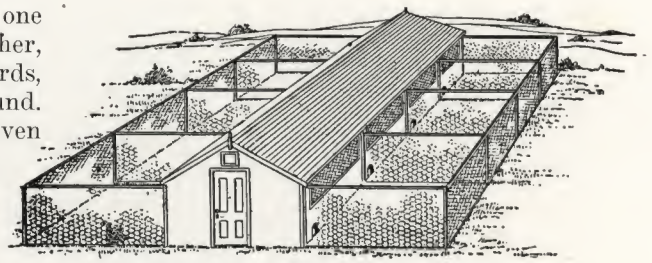
Interior No. 3, 4, 5 Poultry houses. All parts removable. A feeder is included (see page 5). The drop curtain for cold climates is extra.

ALL the WIGWARM Poultry Houses are fitted with the most up-to-date appliances, conveniently arranged and in a most sanitary form. These interior fittings are all detachable and quickly removed for a thorough cleaning or to make the pen ready for other purposes.

Cedar is used almost exclusively in these houses and is a wood that will not be infected by vermin, as all other woods are. All the lumber used is dipped into tanks of creosote preservative, increasing its durability and sanitary qualities. It is the attention we give to these details that has made the *Wigwarm* Poultry Houses so satisfactory to their owners and makes poultry keeping a pleasure as well as profitable.

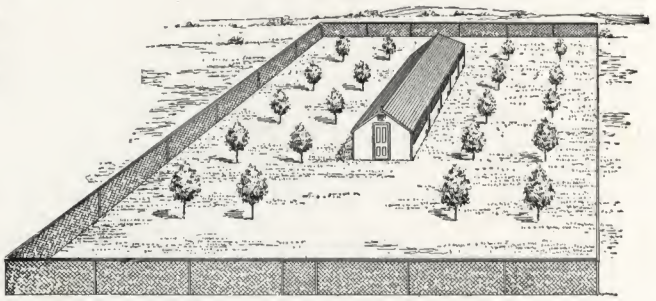
Poultry Yards

Alternating yards, that is, yards used on one side of the house a short time, then on the other, make it possible to grow oats in the vacant yards, supplying green food and renovating the ground. Hens running over the same ground, even though the yard is of good size, will soon contaminate the ground; and this system of yarding overcomes this trouble with very little difficulty. The size of the yard is 10 feet wide by 30 to 50 feet in length. We do not furnish these yards. Extra hen doors in rear of pens $1.00 each.



No. 4 SECTIONAL HOUSE OF FOUR UNITS
10 x 40 ft. With alternating yards, each 10 x 20 ft.
For 160 hens.

THIS picture illustrates one of our No. 4 Five Unit Houses in a yard about 100 x 100 feet. The partitions are partly opened up to make one large pen 10 x 50 ft. 200 hens kept in this manner will produce good results with but little labor.



"KINCRAIG," GREENWICH, CONN.

"We have found the four unit No. 4 Sectional Poultry House supplied by you perfectly satisfactory." MRS. JAMES C. GREENWAY.

REST HAVEN FARM, ROANOKE, VIRGINIA.

"The three unit No. 4 WIGWARM Sectional Poultry House purchased from you is by far the best I have ever seen. Besides being well built and good to look at, its interior equipment with a few improvements would be hard to approach."

L. B. PACE.

514 THIRD AVE., WARREN, PENNA.

"I am glad to advise that the three unit No. 4 WIGWARM Sectional Poultry House purchased from you is entirely satisfactory to me, and is giving good service. The entire assembly seems to be arranged in most convenient form."

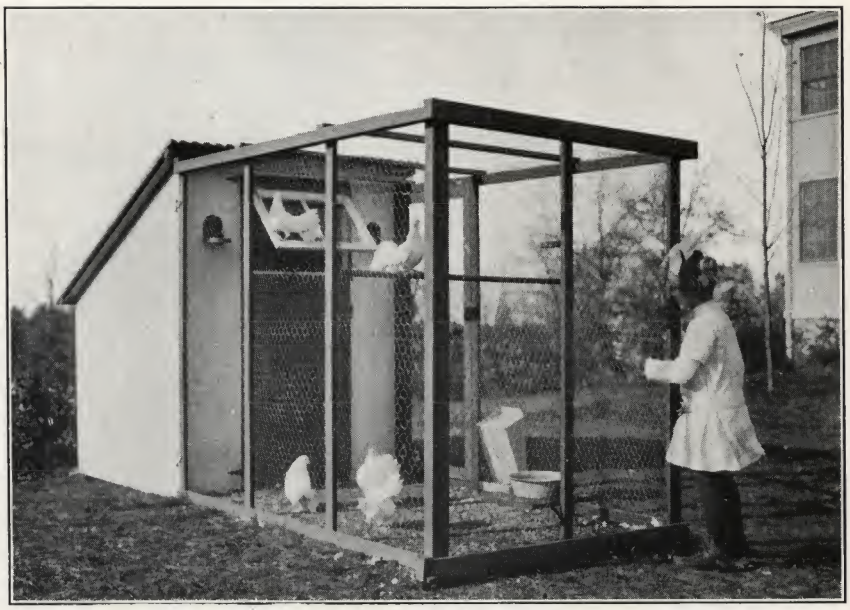
G. M. GRANDIN.

Wigwarm Pigeon House No. 1

THIS pigeon house, with a flight cage attached, is practical for from five to ten pairs of pigeons. We furnish nesting room for five pairs, but more can be easily added. We also furnish an automatic feeder, a water dish, and ample perches.

There is a gate leading into the flight cage and a door with a window leading into the house.

The house is complete in every detail and shipped to you in but six sections, in a form that reduces the transportation charges to a minimum. It is easily put together in a half hour's time. Neatly painted.



WIGWARM PIGEON HOUSE No. 1. Price in back of catalog.
Size 4 x 4 ft. x 5 ft. high. Cage, 4 x 6 ft. Capacity, 5 to 10 pairs.

Wigwarm Pigeon House No. 2

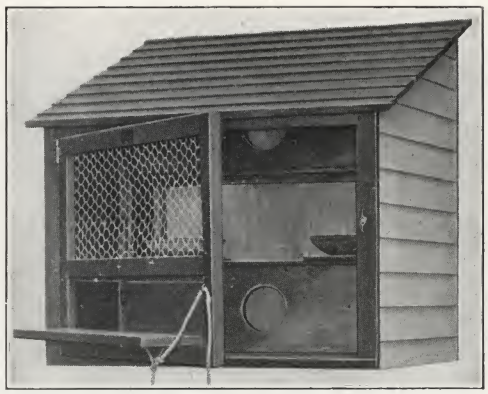
THIS pigeon house has the cote and flight cage under one roof, making it very convenient for the attendant. At the rear is a set of nest compartments completely housed in and protected by a removable front, which makes it convenient to clean.

It is made in a few completed sections and is quickly bolted together. The exterior is well painted and the interior treated with a vermin proof disinfectant. The price quoted includes nests, feeder and water dish, all that is necessary.

WIGWARM PIGEON HOUSE No. 2
Complete set of interior fittings included.
Size, 6 x 6 x 7 ft. high. For 20 pigeons.

Wigwarm Wall Dove Cote

THIS pigeon house is especially designed to fasten to a building any distance up desired. A cord controls the flight board to release the pigeons. The interior is fitted with separate compartments with fibre nests for three pairs of birds.



WALL DOVE COTE. Price in back of catalog.
Fitted for 3 pairs of pigeons. Size, 2 x 3 ft.

MASONIC HOME, UTICA, NEW YORK.

"I am pleased to say that the three No. 2 Pigeon Houses which I purchased from you are satisfactory in every way.

"Our birds went through last winter, which was a terrible one here, in splendid shape. I fear that I cannot make any suggestions as to improvement in these houses." WILLIAM J. WILEY, *Supt.*

PRICES IN BACK OF CATALOG

Wigwarm Kennels

Wigwarm Kennel No. 1

THIS Kennel is for one dog of almost any size. It is well ventilated and easily kept in a most sanitary condition, the floor being easily detached for cleaning. It is made of durable materials and is very attractive in any surroundings. The matched board sides and the red cedar roof make it absolutely storm-proof.

There are but seven sections used in making up this kennel, which can be easily put together by anyone in a few minutes' time. It is shipped "knocked down" in such form as to reduce the transportation charges to a minimum.

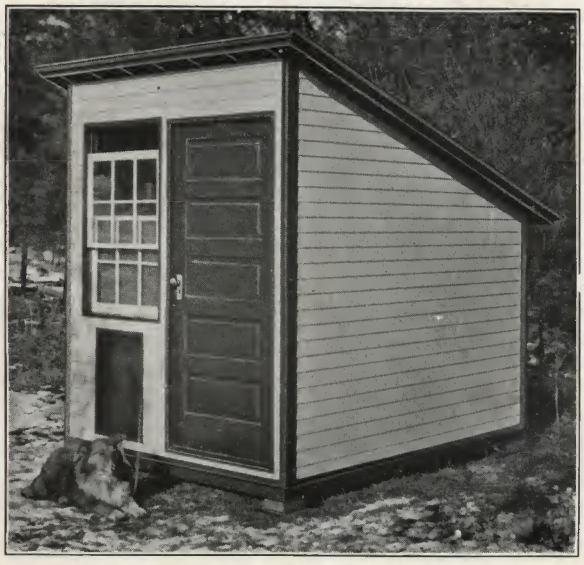
It would be difficult indeed to make a more durable, comfortable and attractive kennel at any cost. They are neatly painted.

WIGWARM KENNEL No. 1 (with partition)
Two sizes. No. 1, 2½ x 4 ft. No. 2, 3½ x 5 ft.
With a partition the kennel has the door in the end
Prices in back of catalog.

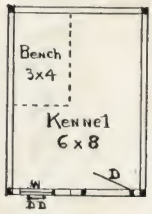
Wigwarm Kennel No. 3

The No. 3 Kennel is a neat, sanitary and practical building, built of red cedar that will last for years and has a good hard pine floor. The interior is furnished with a detachable bench and all interior woodwork is creosoted, making it sanitary and durable, and easily cleaned. The exterior is painted.

The front has a regular double-hung window, protected inside by netting. Both upper and lower sash open, giving good ventilation. Below the window is the dog door and the large panel door at right of windows is fitted with a good mortised lock. The building makes a warm, durable kennel for use the year round.



No. 3 KENNEL. Price in back of catalog.
Size, 6 ft. wide, 8 ft. deep.



Plan No. 3
Kennel

CHICAGO, ILL.

"We wish to state that the kennel we purchased met all expectations, and we are very much pleased with it, as well as with the Laying House, which we purchased from you."

H. EARL HOOVER.

CARLISLE, PENNA.

"We have received the No. 2 Dog Kennel that you shipped us, and find it very satisfactory."

GUY CARLTON LEE.
M. Dugan, *Secretary.*

PHILADELPHIA, PENNA.

"The Dog Kennel arrived, and I am very much pleased with it."

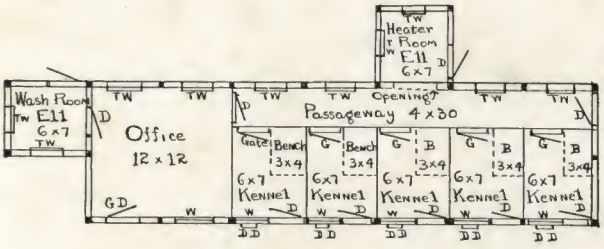
WM. A. GLASCOW, JR.

PRICES IN BACK OF CATALOG

Size 12 x 48 ft. Office and Five Kennels (more can be added)

Hodgson Kennel No. 4

IN the price list under No. 4 Kennel is given the price of the 12 x 12 ft. office separately, also the price of each kennel, so that any number from one up can be bought. Each kennel contains a bench, one double-hung window, a dog door and a regular panel door in front. The partitions are boarded up solid, some 4 ft. with about 3 ft. of fine square mesh netting above. The door or gate from passage to kennel is Dutch style. The passage is wide and roomy and well lighted by transom windows. The ells can be dropped if not needed, or increased in size to 7 x 12 ft. The building is furnished with a good hard pine floor, but if you prefer to put in a cement floor we will allow you for the wooden floor. The sides and roof are of red cedar and the interior woodwork is treated with a sanitary preservative. Painted three coats.



Plan of No. 4 Kennel showing arrangement of rooms. It can be added to at any time. It can be bought without the office or ells, and as many of the kennels as desired.

ITEMIZED LIST, KENNEL No. 4

1 Office, 12 x 12 ft., including doors, windows and partitions, etc.

5—6 x 7 ft. Kennels, including partitions, gates, passage windows, doors and benches.

Ells 6 x 7 ft.

This kennel has twelve 6 x 8 kennels or pens, while kennel shown above has but five. They are easily enlarged at any time.

OLD HOMESTEAD BIRD HOUSE
16 x 18 inches—10 rooms—16 ft. Pole

Hodgson Bird Houses

OUR bird houses are attractive and practical. Being well made, mostly of red cedar, and well painted or Cabot's stain, they are durable. They can be easily opened up or taken apart for spring house cleaning, which should be done each season before nesting time.

BUNGALOW BIRD HOUSE
6 rooms with 16 ft. pole
Size 24 x 28 inches, including porch.

BIRD VILLA
24 x 28 inches—14 rooms—16 ft. Pole

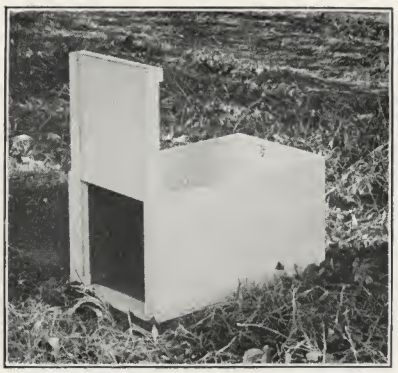
Attracting the Wild Birds

UP to within recent times many who provided care, food and shelter to our wild birds did so from humanitarian motives and the pleasure to be had from having them in their grounds and around their homes. But today we are realizing more and more the great value of the wild birds in protecting our shrubs, trees, orchards, crops, etc., from the horde of insect pests which cause losses of untold amounts each year; and so the wild birds are now most enthusiastically catered to and sought after.

In winter we have only to offer food to the birds to attract them. Shelter and protection will keep them. In summer they must have protection and a home.

WINDOW FEED AND SUET SHELTER

No. 6. BLUE BIRD HOUSE
For Blue Birds, Wrens, Tree and Barn Swallows
4 Rooms, 10 ft. Pole



TRAP FOR BIRD ENEMIES
Cats, Squirrels, Weasels, Skunks, Etc., Automatic. Locks when closed. Does not harm animal.

No. 5. WREN HOUSE
2 Rooms—10-ft. pole.
For Blue Birds, Wrens, Tree and Barn Swallows.

PRICES IN BACK OF CATALOG

REVOLVING FEED SHELTER
With 7 ft. Pole. Size 24 x 36 inches.

Tree Box No. 3 (top picture).
Tree Box No. 4 (center picture).
Bottom picture shows box open to clean
No. 3 Box is for House Wrens, Chicadees, Nuthatches, etc.
No. 4 Box for Blue Birds, Wrens, Woodpeckers, Tree Swallows, etc.

Birds long absent from a neighborhood will find their way back soon after provisions for their comfort are made. There is no bird that can be so readily increased in number, in many localities, by putting up nesting houses for them, as can the purple martin. But the list of birds that can usually be attracted to our homes in the northeastern and middle states is long and varied, and includes blue birds, wrens, red winged black birds, cat birds, flycatchers, chicadees, flickers, cardinal birds, finches, juncos, nuthatches, king birds, orioles, scarlet tanagers, thrushes, warblers, and others equally well known.

The placing of your bird houses and food shelters has much to do with their success. Houses for the sociable martins are usually placed in an open space near dwellings, but not within twenty feet of buildings or trees; blue bird houses in orchards having scattered trees; wrens like to build their homes in houses placed in shrubbery; the well-loved robin likes to find her open nesting box in the large-spreading tree, under the eaves of porches, or in a chimney corner; nuthatches and most of the woodpeckers prefer to have their homes in the woods, although the friendly flicker and red-headed woodpecker like to nest in houses placed among scattered trees; swallows nest in open spaces; crested flycatchers, chicadees, finches are not particular.

Care should be taken to face the houses away from the prevailing stormy weather winds.

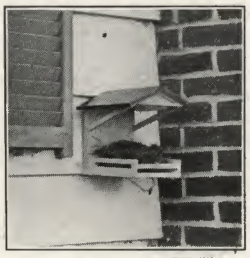
The homing instinct is strongly developed in birds and many may be relied upon to return season after season to enjoy the same comforts and protection afforded them by their human friends.

The houses should be thoroughly cleaned out each year before the birds are ready for nesting.

The birds can get along very comfortably in summer without seeking food from their human friends, but in winter, when the frozen insects, eggs, seeds of weeds, etc., on which they naturally feed, are covered by snow, it is essential that food be placed where they can find it.

We are often asked what to feed the birds. Almost anything eatable will keep them from starving. They like cracked corn, cracked rice, grain, scratch feed, bread crumbs, chaff from the barn floor, hemp and sunflower seeds, mixed bird seeds, etc. Nut meats are eagerly taken; also suet and fats of all kinds.

Try coaxing some of the birds to feed from your window sills, using our window feed and suet shelters. It will surprise you to see how tame they will become, especially the chicadees and nuthatches. By offering them a broken nut, a piece of doughnut, some suet, many people can coax these birds to feed from their hand regularly each day.

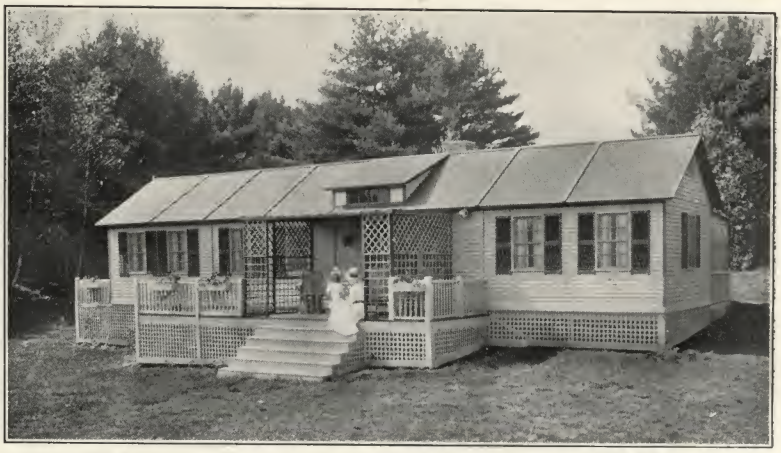


ROBINS' NEST

Protect the wild birds, feed them, house them, water them, and in doing this you are carrying on a fine work that will return to you payment a hundred fold.

HODGSON PORTABLE HOUSES

THIRTY-ONE years ago we started in a humble way in a small shop. Today we have a spacious, daylight factory equipped with the most modern machinery and operated by men who have made portable houses a life-long study. With this equipment and training, the houses we are able to turn out have won for us an undisputed reputation for being practical, durable and artistic, with a decided sense of individuality and refinement that appeals to all who appreciate these qualities. The fact that 75 per cent. of our business each year comes through customers who have used our houses for years, proves that our efforts in building a portable house with these features have been appreciated. They are to be found on the finest estates in this country, being used for cottages, garages, playhouses, garden houses, overflow houses, poultry houses, etc. Send for our catalog. It tells you all.



In constant use for seventeen years and still in fine condition

Garages for one or more cars

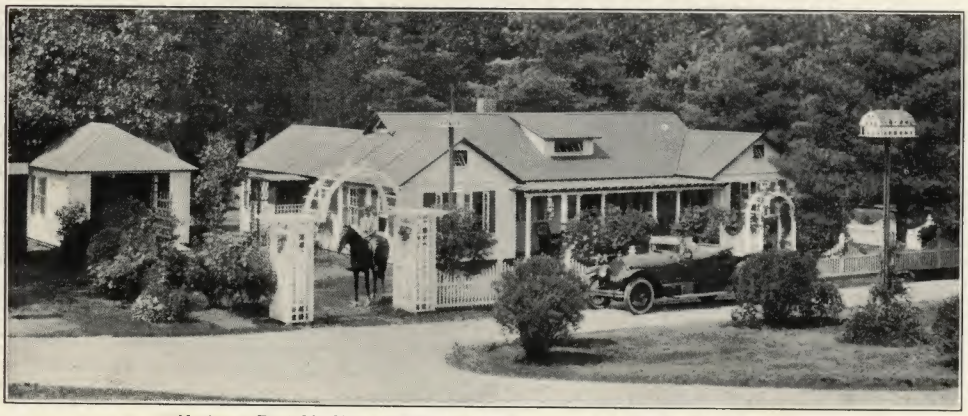
Royal National Mission to Deep Sea Fishermen, Labrador Branch

ST. ANTHONY, NEWFOUNDLAND.

"We found the portable house which you supplied us with in 1909 extremely practicable for this northern climate. It has been used by us as a house for Reindeer Herders ever since its installation and is still being used."

Yours sincerely,
W. T. GREENFELL, M.D.

Play Houses in many styles and sizes



Hodgson Portable Houses are used in many countries and in all climates

Brick House, Noroton, Connecticut.

"Mrs. Carnegie had the portable sunparlor house which she bought of you at Bar Harbor last season, shipped here. She has been very much pleased with the house. It is giving great satisfaction."

Archibald C. Barron,
Secretary,
For Mrs. Andrew Carnegie.

Hodgson Camp Houses

THESE Camp Houses have been on the market for forty years. They have an established reputation for durability and stability. Our system of units makes it possible to easily and quickly erect a one room camp in an hour's time, and the largest one in a few hours, without fuss or muss; also to as quickly and easily add rooms at any time.

Hodgson Camp House Plan A—Price $188.00

Plan A

The smallest camp house generally consists of one room and a porch; although the 10 x 10 ft. room only can be purchased and other rooms or porches can be added later. The price list below will show how this house is figured.

Itemized Price List—Plan A

1—10 x 10 ft. Unit (no windows or doors)		$115.00
1—5 x 10 ft. End Porch		40.00
2—Casement Windows	@ $8.00	16.00
2—pairs Shutters	2.00	4.00
1—Door		10.00
2—Flower Boxes	1.50	3.00
		$188.00

NOTE: Any of the above items may be eliminated; or you can add more if desired. *Read next page.*

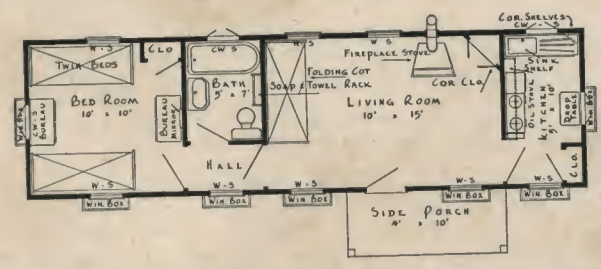
This camp is shown in its natural color, which is cedar, oiled (not painted). Furnishings, see last page.

Hodgson Camp House Plan R—Price $572.50

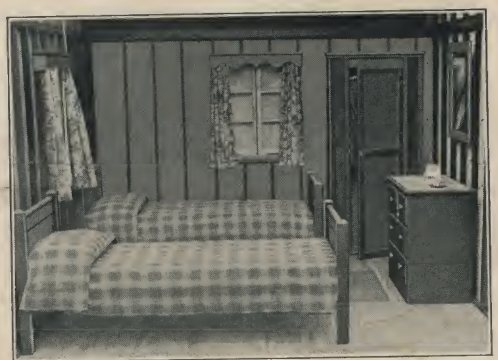
CAMP FURNISHINGS

Furnishings found to be most practical for our camp houses are shown on the last page. The practicability of these furnishings is shown in the picture below—a 10 x 10 ft. room with two bureaus, mirror, clothes closet and twin beds. (See prices on last page.)

Twin beds	$10.00 each
Springs	4.75 "
Mattress	7.00 "



Plan R completely furnished. Many of the furnishings are shown on the last page. On exhibition at our New York Show Room. Price without furnishings $572.50



10x10 Bedroom. Window cornice with rod $2.00

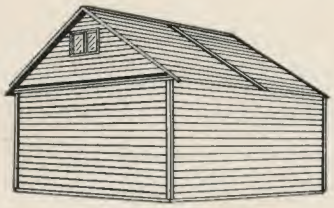
South Sudbury is on the Boston-New York Post Road near the Wayside Inn.

Hodgson Camp House Construction



10 x 10 ft. House without windows or doors $115.00
For each Window add . . 8.00
Door 10.00

MADE in Units. Easily and quickly increased in size.

With 40 years' experience in making unit built houses, we know that these Camp Houses are as practical as it is possible to make.

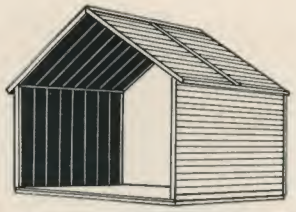
THE FRAMES are of strong Oregon pine and cedar.

THE OUTSIDE COVERING is of enduring cedar, which will last a lifetime.

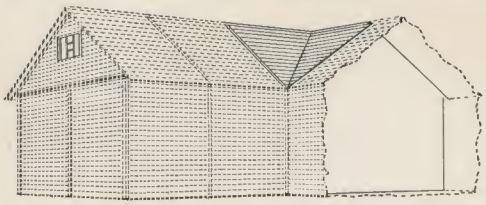
THE EXTERIOR WOODWORK is dipped in tanks of linseed oil before being made up into sections.

ALL OUTSIDE NAILS are hot dipped galvanized and the hardware is either brass or cadmium plated, thus preventing rust.

SECTIONS are bolted together with our special WEDGE KEY BOLTS, an invention of ours dating back 35 years. We are using thousands of these each year, saving our customers much expense in the erection of our buildings.

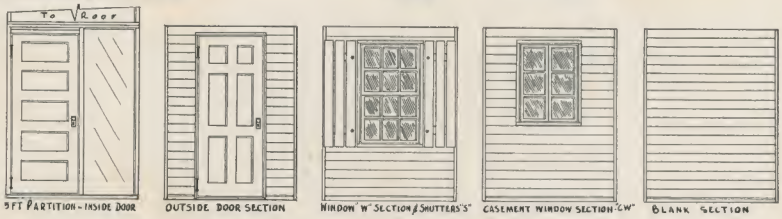


A 5 x 10 ft. Additional Unit to enlarge the house . . $37.50
A 10 x 10 ft. Additional Unit to enlarge the house . . 75.00
Regular Window . . . 8.00
Casement Windows $8.00 each.
Doors $10.00 each.
Shutters that screw on (not hinged) $2.00 per pair.
3 ft. Flower Boxes, $1.50 each.



A valley roof section to turn the units a quarter turn $50.00
Additional gable ends 20.00

Our Wedge Key Bolts that make the houses go up like magic.



These sections are used in making up the side walls and partitions of all our camp houses.

A 10 ft. Partition without peak or door $14.00
A Peak . . . $6.00
Door 10.00
5 ft. Partition to roof $10.00

THE PANEL DOORS are of the best quality, with good mortised locks.

THE INTERIOR is lined with a heavy tan fibre, waterproof and windproof, making a very dry camp. The woodwork is stained walnut brown.

PARTITIONS are made up with a cedar frame and covered with Celotex. They are furnished with or without peaks or doors.

THE CASEMENT WINDOWS have automatic adjusters and secure locks. Regular double hung windows have locks.

FLOOR, ROOF, SIDES and PARTITIONS, all made in sections with doors and windows installed, are quickly Key Bolted together. A 10 x 10 ft. Camp House can easily be erected in an hour.

There is no Roofing Material to put on after the building is up.

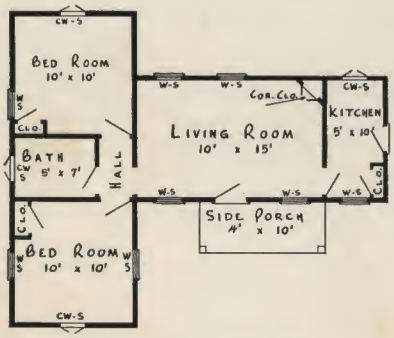
The sections are shipped unpainted, but oiled. We can furnish paint, white or green, at $3.00 per gallon; or Cabot's outside brown stain at $1.75 per gallon; green stain at $2.00 per gallon.

End Porch to go on ends of house only, 5 x 10 ft. $40.00
10 x 10 ft. End Porch 70.00

Side Porch to go on sides or ends of house 4 x 10 ft. . . $30.00
Additional 4 x 5 ft. units . 15.00
8 x 10 ft. Porch 60.00
Additional 5 x 8 ft. units . 30.00

Treated cedar foundation posts cost 15c per lineal foot; a 10 x 10 ft. Camp will require 30 lineal feet, costing $4.50.

TERMS OF PAYMENT: The prices listed are net. A deposit of 25% is required with all orders when placed. The balance may be paid prior to shipment; sight draft attached to bill of lading; or if satisfactory references are given, the balance may be paid after goods are received.



Plan S, Price $727.50

At our Dover, Mass., Outdoor Exhibit, also at the Boston Sportsman's Show

Twenty Years at Moosehead Lake, Maine . . .

"I have just returned from my Hodgson house on Moosehead Lake, Maine. After twenty years of snow and ice it protected us most comfortably through a big gale and snowstorm."

(Mrs.) Cornelia L. Nelson,
Peekskill, N. Y.

Perfect After Eleven Years in Northern New Hampshire . . .

"Will you please advise me as to the correct method of taking down one of your cottages which I purchased of you eleven years ago, and which has braved the climate of Northern New Hampshire, with no further attention, all these years, than a new coat of paint on the roof. It really is a most remarkable piece of ingenious workmanship, and I congratulate you.

"Now I wish to remove it to another location."

(Miss) Mary C. Colby,
The Copley-Plaza, Boston, Mass.

Royal National Mission to Deep Sea Fishermen—Labrador Branch . . .

"We found the Hodgson house which you supplied us in 1909 extremely practicable for this northern climate. It has been used by us ever since its installation and is still being used."

W. T. Grenfell, M.D.

Seven Years in the Adirondacks . . .

"Our Hodgson house is still much admired and is perfectly good after seven long Adirondack winters and summers.

"My house is often called 'the Godmother of all the other Hodgsons at Honnedaga'."

Mrs. J. R. Lovejoy,
1222 Lenox Rd., Schenectady, N. Y.
